BDI is a full-range supplier of innovative upcycling solutions.

With nearly 30 years of experience, BDI is a global leader in waste-based biodiesel and advanced recycling technologies.

BDI develops innovative solutions for converting waste streams into valuable products – including multi-feedstock biodiesel, advanced feedstock pretreatment for SAF production and chemical recycling. In addition, BDI specializes in retrofitting and upgrading existing biodiesel and feedstock pretreatment plants to meet future requirements.

Our technologies enable:

- » Flexible processing of diverse waste-based feedstocks
- » High-quality end products
- » Efficient, cost-optimized plant operation
- » Modernization and performance improvement of existing plants (RetroFit)

**Turning waste into value –
reliably and at scale.**
