

AT YOUR SERVICE INSTALLATION & COMMISSIONING

WORLDWIDE INSTALLATION OF YOUR MACHINES HAS NEVER BEEN EASIER

With a pool of over 150 highly skilled and well trained, full time employed service engineers, we will always ensure the installation of your machine is up to the highest technical standards as well as in line with local regulations and requirements.

You can choose from anywhere between professional installation assistance through expert supervision to full turn-key installation of your equipment. All engineers assigned to you can communicate fluently in technical English as well as in the local language of their host country.

The high level of experience and number of specialist trainings our engineers receive further ensure the smooth and reliable operation of your project with all of the important steps taken care of by the Rieckermann Technical Service Division.

ABOUT US REMA TECHNIK

WHO WE ARE

ReMa Technik evolved out of RIECKERMANN PHILIPPINES, INC. longstanding activities in the food & meat processing industry. Based on our exclusive partnerships with renowned European suppliers in this segment for the past 30 years, we have gained excellent market access & unparalleled know-how in supplying and servicing our machinery & equipment in the field.

This expertise and the local and regional demand for high-quality refurbished and reconditioned meat and food processing machinery & equipment convinced us to invest in a 400sqm facility enabling us to carry out local overhauling and testing on selected imported secondhand equipment at highest quality levels.

We guarantee that only original OEM spare parts are used. In addition to this, the OEM certified, trained engineers who are responsible for any repair or overhauling work required have many years of field experience. This allows us to give our customers a 6-month warranty on all reconditioned machines and refurbished equipment.

ReMa Technik furthermore offers the option of renting equipment during production peaks. On a rental basis, we can also provide back up units while existing systems are removed and repaired, thus avoiding production downtimes. Last but not least, we can organize training and seminars for machine operators and technicians.

OUR PRINCIPLES

ReMa Technik was set up in response to local and regional needs for quality supply of refurbished meat and food processing equipment. ReMa Technik's philosophy is to provide overhauling services for equipment brands that RIECKERMANN PHILIPPINES, INC. also exclusively carries within their new equipment portfolio. Given the direct access to all required data of used machinery plus the supply of original spare parts through our exclusive OEM partners, we guarantee our equipment to be expertly and genuinely overhauled. It is sold with a 6-month warranty. Our in-house OEM trained service engineers further assure our clients of expert installation, training, and trouble-shooting services while our showroom displays the latest range of machinery on sale for inspection and test-runs, if required.

OUR TRAINED & CERTIFIED SERVICE ENGINEERS PROVIDE

- Local repair & overhauling of used equipment
- Supply of new & refurbished machinery with warranty
- Trade-in of selected used equipment
- Production trials at our own showroom
- Demonstration runs & training of operators
- Supply of spare parts, trouble-shooting etc.

WE GUARANTEE OUR EQUIPMENT TO BE **EXPERTLY AND GENUINELY OVERHAULED**
AND SOLD WITH A **6-MONTH WARRANTY**
